

Class 11 Biology: High-Yield Diagram & Mark Breakdown

Chapter 2: Biological Classification (NCERT Page-wise Priority Guide)

Instructions for Students: Practice sketching neat pencil diagrams and write labels in CAPITAL letters. Marks indicate typical Board Exam weightage for diagrammatic and identification questions.

Fig No.	Diagram / Topic	NCERT	Marks	Priority	Key Labelling Points / Concepts
Fig 2.6 (b)	Bacteriophage	Pg 20	2 – 3 M	Top Priority	Hexagonal Head (dsDNA), Collar, Helical Sheath, Tail fibres, Base plate
Fig 2.6 (a)	Tobacco Mosaic Virus (TMV)	Pg 20	2 – 3 M	Top Priority	Helical Capsid (Capsomeres), Single-stranded RNA (ssRNA) core
Fig 2.2	Filamentous Blue-Green Alga (<i>Nostoc</i>)	Pg 13	2 – 3 M	Top Priority	Heterocyst (N ₂ fixation site), Mucilagenous / Gelatinous sheath
Fig 2.4 (a–d)	Protista (<i>Euglena</i> , <i>Paramecium</i> , Dinoflagellate, Slime mould)	Pg 15	2 – 3 M	Top Priority	<i>Euglena</i> : Pellicle, 2 flagella. <i>Paramecium</i> : Cilia, Gullet, Contractile vacuole. <i>Dinoflagellate</i> : Cellulose plates
Fig 2.1	Bacteria of Different Shapes	Pg 12	2 M	High Priority	Cocci (spherical), Bacilli (rod-shaped), Spirilla (spiral), Vibrio (comma)
Fig 2.3	Dividing Bacterium (Binary Fission)	Pg 14	2 M	High Priority	Cell wall, Cell membrane, DNA / Nucleoid dividing into daughter cells
Fig 2.5 (a–c)	Fungi Types (<i>Mucor</i> , <i>Aspergillus</i> , <i>Agaricus</i>)	Pg 17	1 – 2 M	Moderate	<i>Mucor</i> : Sporangiophore & Sporangium. <i>Aspergillus</i> : Conidiophore & Conidia

EXAM STRATEGY & GUIDELINES

- **Viral Diagrams (2–3 Marks):** High repetition in exams. Ensure correct proportions of the hexagonal head and helical sheath in Bacteriophage.
- **Heterocyst Function:** Often asked as a 1-mark identification + function sub-question attached to Fig 2.2.
- **Table 2.1 (Pg 11):** Revise Five Kingdom characteristics alongside diagrammatic practice.
