

Name: _____

Section: _____

Date: _____

SECTION A – Fill in the Blanks (1 mark each)

1. Aristotle classified plants using morphology into trees, _____, and herbs.
2. The Two Kingdom system of classification was proposed by _____ in the year 1753.
3. Aristotle classified animals possessing red blood as _____.
4. Animals lacking red blood were classified by Aristotle as _____.
5. The Two Kingdom system grouped bacteria and blue-green algae under Kingdom _____.
6. The Two Kingdom system failed to distinguish _____ cells from eukaryotic cells.
7. Fungal cell walls are made of _____, unlike the cellulose walls found in plants.
8. The Two Kingdom system considered only gross _____ and ignored cell structure and nutrition.

SECTION B – One-Word / Very Short Answer (1 mark each)

1. Who proposed the earliest classification of living organisms based on simple morphology? **Ans:**

2. Name the two kingdoms proposed by Linnaeus in 1753. **Ans:** _____
3. Which criterion did Aristotle use to divide animals into Enaima and Anaima? **Ans:**

4. Name one unicellular organism that was inconsistently grouped under 'algae'. **Ans:**

5. Which multicellular alga was grouped alongside unicellular Chlamydomonas under the two kingdom system? **Ans:** _____

SECTION C – Match the Following (4 marks)

Column A	Column B
1. Aristotle	a. Multicellular alga grouped with unicellular forms
2. Linnaeus	b. Proposed the Two Kingdom system
3. Chlamydomonas	c. Unicellular alga inconsistently classified
4. Spirogyra	d. Classified organisms using morphology (Enaima/Anaima)

Answer: 1-____, 2-____, 3-____, 4-____

Name: _____

Section: _____

Date: _____

SECTION D – True or False (1 mark each)

1. The Two Kingdom system distinguished eukaryotic cells from prokaryotic cells. [True / False]
2. Aristotle grouped plants morphologically into trees, shrubs, and herbs. [True / False]
3. Linnaeus's Two Kingdom system included Kingdom Monera as a separate group. [True / False]
4. Fungi were inconsistently grouped along with autotrophic plants in the Two Kingdom system. [True / False]

SECTION E – Short Answer (3 marks each)

1. State two limitations of the Two Kingdom classification system.

2. Why was Chlamydomonas classified inconsistently under the Two Kingdom system?

3. What two criteria did Aristotle use to classify animals?

SECTION F – HOTS / Long Answer (5 marks each)

1. "The Two Kingdom system used gross morphology only." Justify this statement using two examples from the chapter.

2. Compare Aristotle's classification of animals with the Two Kingdom classification in terms of scientific basis and criteria used.
