

Name: _____

Section: _____

Date: _____

SECTION A – Fill in the Blanks (1 mark each)

1. Diatom cell walls are embedded with _____, making them highly resistant to decay.
2. The fossilised remains of diatoms form a deposit known as _____.
3. Dinoflagellates possess a stiff cell wall made of _____ plates.
4. The rapid multiplication of *Gonyaulax* in the sea causes a phenomenon known as _____.
5. Euglenoids possess a flexible, protein-rich layer called the _____ instead of a cell wall.
6. *Euglena* shows _____ nutrition, being autotrophic in light and heterotrophic in the dark.
7. The aggregated mass formed by slime moulds under favourable conditions is called the _____.
8. The protozoan causing amoebic dysentery is _____.

SECTION B – One-Word / Very Short Answer (1 mark each)

1. Name the protist group considered the chief 'producers' of the ocean. **Ans:** _____
2. Name the flagellated protozoan that causes sleeping sickness. **Ans:** _____
3. Name the flagellated protozoan that causes kala-azar. **Ans:** _____
4. Name the ciliated protozoan possessing a gullet. **Ans:** _____
5. Name the sporozoan that causes malaria. **Ans:** _____

SECTION C – Match the Following (4 marks)

Column A	Column B
1. Amoeba	a. Sporozoan
2. Trypanosoma	b. Ciliated protozoan
3. Paramoecium	c. Amoeboid protozoan
4. Plasmodium	d. Flagellated protozoan

Answer: 1-____, 2-____, 3-____, 4-____

Name: _____

Section: _____

Date: _____

SECTION D – True or False (1 mark each)

1. Diatoms have cell walls embedded with silica. [True / False]
2. Euglenoids have a rigid cellulose cell wall. [True / False]
3. Slime moulds are photosynthetic protists. [True / False]
4. Dinoflagellates are mostly marine and photosynthetic. [True / False]

SECTION E – Short Answer (3 marks each)

1. Why is Euglena described as a 'connecting link' between plants and animals?

2. Explain the process by which red tides are formed in the ocean.

3. Differentiate between amoeboid and ciliated protozoans.

SECTION F – HOTS / Long Answer (5 marks each)

1. Justify why slime moulds are classified under Kingdom Protista rather than Kingdom Fungi.

2. Explain the significance of diatoms to marine ecosystems and to human industry.
