

Name: _____

Section: _____

Date: _____

SECTION A – Fill in the Blanks (1 mark each)

1. The thread-like structures forming the fungal body are called _____.
2. A network of hyphae is collectively called the _____.
3. Continuous, multinucleate hyphae without cross walls are called _____ hyphae.
4. The fungal cell wall is mainly composed of _____ and polysaccharides.
5. The symbiotic association between fungi and plant roots is called _____.
6. The three steps of sexual reproduction in fungi, in order, are plasmogamy, karyogamy, and _____.
7. Penicillin is extracted from the fungus _____.
8. Fungi lacking a known sexual phase are classified under _____.

SECTION B – One-Word / Very Short Answer (1 mark each)

1. Name the fungal class with aseptate, coenocytic mycelium, e.g. Rhizopus. **Ans:** _____
2. Name the fungal class producing ascospores inside asci. **Ans:** _____
3. Name the fungal class producing basidiospores exogenously on basidia. **Ans:** _____
4. Name the fungus causing early blight of potato. **Ans:** _____
5. Name the fungus causing late blight of potato. **Ans:** _____
6. Name the fungal class also called 'fungi imperfecti'. **Ans:** _____

SECTION C – Match the Following (4 marks)

Column A	Column B
1. Phycomycetes	a. Agaricus (mushroom)
2. Ascomycetes	b. Alternaria (early blight)
3. Basidiomycetes	c. Aspergillus (sac fungi)
4. Deuteromycetes	d. Rhizopus (bread mould)

Answer: 1-____, 2-____, 3-____, 4-____

Name: _____

Section: _____

Date: _____

SECTION D – True or False (1 mark each)

1. Yeast is a unicellular fungus belonging to Ascomycetes. [True / False]
2. Basidiomycetes reproduce mainly through asexual conidia. [True / False]
3. The dikaryotic (n+n) stage is seen mainly in Ascomycetes and Basidiomycetes. [True / False]
4. Fungal cell walls are made of cellulose, similar to plants. [True / False]

SECTION E – Short Answer (3 marks each)

1. Describe the three steps involved in sexual reproduction in fungi.

2. Differentiate between coenocytic and septate hyphae.

3. Name any two diseases caused by fungi in crop plants, along with the causative organisms.

SECTION F – HOTS / Long Answer (5 marks each)

1. Explain why Deuteromycetes are called 'fungi imperfecti' and describe what happens when their sexual phase is discovered.

2. Compare the four classes of fungi (Phycomycetes, Ascomycetes, Basidiomycetes, Deuteromycetes) based on mycelium type and spore formation.
