

Name: _____

Section: _____

Date: _____

SECTION A – Fill in the Blanks (1 mark each)

1. Plants exhibit _____ of generation, alternating between diploid and haploid phases.
2. The cell wall of plant cells is made of _____.
3. *Dionaea*, commonly called the Venus flytrap, is an example of an _____ plant.
4. *Cuscuta* is an example of a _____ plant.
5. Animal cells, unlike plant cells, completely lack a _____.
6. Animals typically store food reserves as glycogen or _____.
7. The five major divisions of Kingdom Plantae are Algae, Bryophyta, Pteridophyta, Gymnosperms, and _____.
8. Sexual reproduction in animals occurs via copulation followed by _____ development.

SECTION B – One-Word / Very Short Answer (1 mark each)

1. Name one insectivorous plant apart from *Dionaea*. **Ans:** _____
2. Name the parasitic plant discussed in this chapter. **Ans:** _____
3. What food reserve do plant cells typically store? **Ans:** _____
4. What type of cell wall do animal cells have? **Ans:** _____
5. Name the phenomenon where plants alternate between sporophyte and gametophyte phases. **Ans:** _____

SECTION C – Match the Following (4 marks)

Column A	Column B
1. <i>Dionaea</i>	a. Sundew (insectivorous)
2. <i>Cuscuta</i>	b. Parasitic plant
3. <i>Drosera</i>	c. Pitcher plant (insectivorous)
4. <i>Sarracenia</i>	d. Venus flytrap (insectivorous)

Answer: 1-____, 2-____, 3-____, 4-____

Name: _____

Section: _____

Date: _____

SECTION D – True or False (1 mark each)

1. Animal cells possess a cellulose cell wall. [True / False]
2. Plants exhibit alternation of generation between sporophyte and gametophyte. [True / False]
3. Cuscuta is an example of an insectivorous plant. [True / False]
4. Higher animals show elaborate sensory and neuromotor mechanisms. [True / False]

SECTION E – Short Answer (3 marks each)

1. Give two examples of insectivorous plants and explain why they show partial heterotrophy.

2. List three key differences between plant cells and animal cells.

3. Name the five major divisions of Kingdom Plantae.

SECTION F – HOTS / Long Answer (5 marks each)

1. Explain why insectivorous and parasitic plants are still classified under Kingdom Plantae despite partial or complete heterotrophy.

2. Discuss the significance of alternation of generation in the life cycle of plants.
