

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Angiosperms

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section A — Fill in the Blanks

5 Questions · Angiosperms

1. In angiosperms, pollen grains and ovules develop within the _____.
2. Angiosperm seeds are enclosed within the _____.
3. Angiosperms are divided into dicotyledons and _____.
4. The smallest angiosperm mentioned in the chapter is _____.
5. The tallest angiosperm example mentioned is _____, over 100 metres.

Section B — One-word Answers

1. What structure encloses the ovule in angiosperms? _____
2. What does the ovary develop into after fertilisation? _____
3. Name the two classes of angiosperms. _____
4. What key products do angiosperms provide to humans? _____
5. What is the key structural difference between angiosperm and gymnosperm ovules?

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Angiosperms

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section C — Match the Following

Column A	Column B
1. Wolffia	a. Develops from ovary
2. Eucalyptus	b. Tallest example (100+ m)
3. Ovary	c. Encloses the ovule
4. Fruit	d. Bears pollen grains and ovules
5. Flower	e. Smallest angiosperm

Section D — True / False

1. Angiosperm ovules are naked like gymnosperms. _____
2. Angiosperm seeds are enclosed in fruit. _____
3. Angiosperms are divided into dicots and monocots. _____
4. Wolffia is the tallest known angiosperm. _____
5. Angiosperms occur in a wide range of habitats. _____

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Angiosperms

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section E — Short Answer

1. How does the angiosperm ovule differ structurally from the gymnosperm ovule?

2. What is the significance of fruit formation in angiosperms?

3. Name the two classes of angiosperms and state the basis of this division.

Section F — HOTS (Higher Order Thinking)

1. Explain why the flower and fruit are considered angiosperms' key evolutionary innovations compared to gymnosperms.

2. Discuss how the enclosed-seed strategy of angiosperms might contribute to their exceptional diversity and range of habitats.
