

CHAPTER 4 • FULL CHAPTER REVISION WORKSHEET

Animal Kingdom — Mixed-topic Practice

Student Name: _____ Section: _____ Roll No.: _____

Section A — Short Recall

1. Which of the following is NOT a basis of classification of Kingdom Animalia?
2. Sponges show which type of body plan?
3. Metameric segmentation is best exemplified by
4. Sponges have which level of organisation?
5. The single opening of the gastro-vascular cavity in coelenterates is the
6. The locomotory organs in Ctenophora are
7. Platyhelminthes are commonly known as
8. Aschelminthes are commonly known as
9. The excretory organs of Annelida are called
10. The largest phylum in Animalia is

Section B — Answer in 2-3 marks

11. Explain the key features of Phylum Porifera with reference to Organisation and Water Canal System.

12. Explain the key features of Phylum Coelenterata (Cnidaria) with reference to Organisation and Cnidoblasts.

13. Explain the key features of Phylum Ctenophora with reference to Key Organisation Features.

14. Explain the key features of Phylum Platyhelminthes with reference to Body Plan and Organisation.

15. Explain the key features of Phylum Aschelminthes with reference to Body Plan and Digestion.

16. Explain the key features of Phylum Annelida with reference to Body Organisation and Segmentation.

17. Explain the key features of Phylum Arthropoda with reference to Body Plan and Organisation.

18. Explain the key features of Phylum Mollusca with reference to Typical Molluscan Body Plan.

CHAPTER 4 • FULL CHAPTER REVISION WORKSHEET

Animal Kingdom — Mixed-topic Practice (continued)

Student Name: _____ Section: _____ Roll No.: _____

Section C — Compare and Analyse

19. Compare Porifera and Coelenterata on: level of organisation, symmetry and special cells.

20. Compare Platyhelminthes and Aschelminthes on: body cavity and digestive tract.

21. Compare Chondrichthyes and Osteichthyes on: endoskeleton, gills and examples.

22. Compare Amphibia, Reptilia, Aves and Mammalia on: skin, heart, respiration and reproduction.

_____**Section D — Long Answers**

23. Describe the bases used to classify animals and explain how symmetry, germ layers and coelom help reveal body plans.

24. Write the salient features, examples and distinguishing adaptations of any five major animal phyla.

25. Trace the diagnostic chordate features and compare the main vertebrate classes using suitable examples.
