GOVERNMENT OF KARNATAKA

DEPARTMENT OF SCHOOL EDUCATION (PU)

LESSON BASED EVALUATION (LBA) 2026-27

SUBJECT – BIOLOGY (36)

CLASS – II PUC

Unit Test 1 – Model Question Paper

Time – 60 Mins Marks – 30

I. Select the correct alternative from the choices given below. 1X7 = 07

1. Arrange micro-sporangial wall in sequence of outside to inside

   A) Epidermis, middle layer, endothecium, tapetum

   B) Epidermis, endothecium, middle layer, tapetum

   C) Epidermis, middle layer, tapetum, endothecium

   D) Endothecium, middle layer, tapetum, epidermis

2. Female gametophyte of angiosperm represented by –

   A) Nucellus B) Embryosac C) Integument D) Both A & B

3. During double fertilization in plants, one sperm fuses with the egg cell and the other sperm fuses with

   A) synergids cell B) central cell C) antipodal cell D) nucellar cell

4. Scutellum is present in the embryo of

   A) pea B) Ranunculus C) Triticum D) None of these

5. Seeds are adoptively important because

   A) they maintain dormancy.

   B) they protect young plants during vulnerable stages.

   C) they store food for young plants and facilitate disperal.

   D) All of the above

6. In a fertilized ovule, n, 2n and 3n conditions occur respectively in

   A) antipodal, egg and endosperm. B) egg, nucellus and endosperm.

   C) endosperm, nucellus and egg. D) antipodals, synergids and integuments.

7. While planning for an artificial hybridization programme if the female parent have unisexual flowers, then which of the following steps would not be relevant?

   A) Bagging of female flower. B) Dusting of pollen on stigma.

   C) Emasculation. D) Collection of pollen.

II. Fill in the blanks by choosing the appropriate word given below. **1X3 = 03**

(remnant of nucellus, self pollinated, synergids, degenerate synergid)

8. Filiform apparatus is found in ----------

9. Cleistogamous flowers are ----------

10. Perisperm is a ----------

III. Answer any Two of the following in 3-5 sentences. **2X2 = 04**

11. What are parthenocarpic fruits? Give example.

12. Explain the role of Endothecium.

13. Name the two cells of the pollen grain.

14. Why is apple called a false fruit? Which part of the flower forms the fruit?

IV. Answer any Two of the following in 40-80 words. **2X3 = 06**

15. Explain the role of Tapetum in the formation of pollen grain.

16. What are the characters of insect pollinated flowers (entomophilous flowers)?

17. Explain the mechanism of pollination in water plants like Vallisneria and sea grass (Zostera).

18. What is artificial hybridization? How is it achieved? What is its significance?

V. Answer any One of the following in 200-250 words. **1X5 = 05**

19. What is pollination? Explain the types of pollination.

20. Draw a neat labelled diagram of megasporangium or ovule.

VI. Answer any One of the following in 200-250 words. **1X5 = 05**

21.Explain the structure of L S of grass embryo.

22. Describe double fertilization, Syngamy and triple fusion in angiosperms.
