

Name: _____

Section: _____

Date: _____

SECTION A – Fill in the Blanks (1 mark each)

1. The Two Kingdom classification system was proposed by _____ in 1753.
2. The Five Kingdom classification was proposed by _____ in 1969.
3. Bacterial cell walls are made of _____.
4. The smallest known living organism, lacking a cell wall, is _____.
5. Diatom cell walls are embedded with _____.
6. Euglenoids possess a flexible layer called the _____ instead of a cell wall.
7. The fungal cell wall is composed of _____ and polysaccharides.
8. Penicillin is extracted from the fungus _____.
9. The protein coat of a virus is called the _____.
10. A lichen is a symbiotic association between a fungus and an _____.

SECTION B – One-Word / Very Short Answer (1 mark each)

1. Name the criterion NOT used in the Two Kingdom system but used in the Five Kingdom system. **Ans:** _____
2. Name the sole members of Kingdom Monera. **Ans:** _____
3. Name the kingdom containing unicellular eukaryotes. **Ans:** _____
4. Name the fungal class producing basidiospores. **Ans:** _____
5. Name the human disease analogous to mad cow disease. **Ans:** _____
6. Name the algal partner in a lichen. **Ans:** _____

SECTION C – Match the Following (4 marks)

Column A	Column B
1. Monera	a. Cellulose wall, autotrophic
2. Protista	b. Chitin wall, heterotrophic
3. Fungi	c. Prokaryotic
4. Plantae	d. Unicellular eukaryotes

Answer: 1-____, 2-____, 3-____, 4-____

Name: _____

Section: _____

Date: _____

SECTION D – True or False (1 mark each)

1. The Five Kingdom system uses phylogenetic relationships as a classification criterion. [True / False]
2. Mycoplasma completely lacks a cell wall. [True / False]
3. Diatoms are heterotrophic decomposers. [True / False]
4. Basidiomycetes reproduce mainly by asexual conidia. [True / False]
5. Viroids lack a protein coat and consist of free RNA. [True / False]
6. Lichens are excellent indicators of air pollution. [True / False]

SECTION E – Short Answer (3 marks each)

1. State two limitations of the Two Kingdom classification system.

2. List the four criteria used by Whittaker in the Five Kingdom classification.

3. Differentiate between Archaeobacteria and Eubacteria with an example each.

4. Differentiate between a virus and a viroid based on structure.

SECTION F – HOTS / Long Answer (5 marks each)

1. Justify why Fungi, despite having a cell wall like plants, is placed in a separate kingdom under the Five Kingdom system.

2. Trace the historical development of classification systems from Aristotle to Whittaker, highlighting the key improvement at each stage.
