

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Algae: General Characters

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section A — Fill in the Blanks

5 Questions · Algae: General Characters

1. Algae are chlorophyll-bearing, simple, thalloid and _____.
2. Vegetative reproduction in algae occurs by _____.
3. Asexual reproduction in algae occurs through flagellated _____.
4. Fusion of two similar gametes is called _____ reproduction.
5. Chlorella and Spirulina are also known as _____ food.

Section B — One-word Answers

1. Name an example of a colonial alga. _____
2. Name an example of a unicellular alga. _____
3. Which two genera are the source of Agar? _____
4. What is the hydrocolloid obtained from brown algae? _____
5. What is the hydrocolloid obtained from red algae? _____

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Algae: General Characters

Name: _____

Section: _____

Date: _____

Section C — Match the Following

Column A	Column B
1. Isogamous	a. Dissimilar gametes
2. Anisogamous	b. Similar gametes
3. Oogamous	c. Vegetative reproduction
4. Zoospore	d. Large + small gamete
5. Fragmentation	e. Motile asexual spore

Section D — True / False

1. Algae reproduce only sexually. _____
2. Zoospores are flagellated and motile. _____
3. Volvox shows oogamous reproduction. _____
4. All algae are exclusively marine. _____
5. Algae are major contributors to global CO₂ fixation. _____

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Algae: General Characters

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section E — Short Answer

1. Differentiate between isogamous and anisogamous reproduction.

2. List any three economically important uses of algae.

3. What are pyrenoids?

Section F — HOTS (Higher Order Thinking)

1. Explain why algae, despite being simple thalloid organisms, are ecologically vital as primary producers.

2. A species shows fusion of a small motile gamete with a large non-motile gamete. Identify the reproduction type and give one example.
