

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Classes of Bryophytes

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section A — Fill in the Blanks

5 Questions · Classes of Bryophytes

1. Liverworts reproduce asexually via _____, formed in gemma cups.
2. The first stage of the moss gametophyte is the _____ stage.
3. The moss sporophyte consists of foot, seta and _____.
4. Peat, used as fuel, is obtained from _____.
5. Mosses along with _____ form the pioneer community in succession.

Section B — One-word Answers

1. Name a classic example of a liverwort. _____
2. Name three examples of mosses. _____
3. What develops from a lateral bud on the protonema? _____
4. Where are antheridia and archegonia produced in mosses? _____
5. Why is Sphagnum used as packing material? _____

PU-I Biology — Chapter 3: Plant Kingdom

Name: _____

Section: _____

Date: _____

Section C — Match the Following

Column A	Column B
1. Marchantia	a. Bears gemmae
2. Funaria	b. Moss example
3. Sphagnum	c. Source of peat
4. Gemma cup	d. Filamentous first stage
5. Protonema	e. Liverwort

Section D — True / False

1. Marchantia is a moss. _____
2. Gemmae are formed in gemma cups on the liverwort thallus. _____
3. The protonema develops directly from a moss spore. _____
4. The moss sporophyte is simpler than the liverwort sporophyte. _____
5. Sphagnum peat is used as fuel. _____

Name: _____

Section: _____

Date: _____

Section E — Short Answer

1. Describe the two stages of the moss gametophyte.

2. What is the economic importance of Sphagnum?

3. Differentiate between the sporophytes of liverworts and mosses.

Section F — HOTS (Higher Order Thinking)

1. Explain why the moss gametophyte develops through two distinct stages (protonema and leafy) while the liverwort gametophyte does not.

2. Explain the ecological role of mosses and lichens as pioneer species in succession.
