

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Pteridophyta

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section A — Fill in the Blanks

5 Questions · Pteridophyta

1. Pteridophytes are the first terrestrial plants with _____ tissue.
2. Small leaves as in Selaginella are called _____.
3. Large leaves as in ferns are called _____.
4. The free-living gametophyte of pteridophytes is the _____.
5. Selaginella and Salvinia are _____, producing two kinds of spores.

Section B — One-word Answers

1. What is the dominant phase in the pteridophyte life cycle? _____
2. Name the four classes of Pteridophyta. _____
3. Give an example of Psilopsida. _____
4. Give an example of Sphenopsida. _____
5. What compact structures do sporophylls form in Selaginella and Equisetum?

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Pteridophyta

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section C — Match the Following

Column A	Column B
1. Psilopsida	a. Dryopteris
2. Lycopsida	b. Selaginella
3. Sphenopsida	c. Equisetum
4. Pteropsida	d. Gametophyte
5. Prothallus	e. Psilotum

Section D — True / False

1. The sporophyte is the dominant phase in pteridophytes. _____
2. All pteridophytes are heterosporous. _____
3. The prothallus is haploid. _____
4. Pteridophytes lack vascular tissue. _____
5. Heterospory is a precursor to the seed habit. _____

PU-I Biology — Chapter 3: Plant Kingdom

Worksheet: Pteridophyta

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section E — Short Answer

1. Differentiate between homosporous and heterosporous pteridophytes.

2. Describe the structure and function of the prothallus.

3. Name the four classes of Pteridophyta with one example each.

Section F — HOTS (Higher Order Thinking)

1. Explain why heterospory in Selaginella is considered an evolutionary step toward the seed habit.

2. Compare the dominant generation in bryophytes versus pteridophytes and explain the evolutionary significance of this shift.
