

PU-I Biology — Chapter 3: Plant Kingdom

Full Chapter Revision Worksheet

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section A — Fill in the Blanks (Mixed Topics)

1. The Artificial System of classification was given by _____.
2. Algae are chlorophyll-bearing, simple, thalloid and _____.
3. Chlorophyceae members are commonly called _____ algae.
4. Bryophytes are called _____ of the plant kingdom.
5. Liverworts reproduce asexually via _____, formed in gemma cups.
6. Pteridophytes are the first terrestrial plants with _____ tissue.
7. The word gymnosperm means _____ seed.
8. In angiosperms, pollen grains and ovules develop within the _____.

Section B — One-word Answers (Mixed Topics)

1. Who gave the Phylogenetic System of classification? _____
2. Name an example of a colonial alga. _____
3. Name the pigment responsible for the red colour in Rhodophyceae. _____
4. What does the antheridium produce? _____
5. Name a classic example of a liverwort. _____
6. What is the dominant phase in the pteridophyte life cycle? _____
7. Name the world's largest gymnosperm plant. _____
8. What structure encloses the ovule in angiosperms? _____

PU-I Biology — Chapter 3: Plant Kingdom

Full Chapter Revision Worksheet

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section C — Match the Following (Chapter-wide)

Column A (Topic)	Column B (Key Idea)
1. Classification Systems	a. Linnaeus / Bentham & Hooker etc.
2. Algae: General Characters	b. Iso/Aniso/Oogamous reproduction
3. Classes of Algae	c. Chlorophyceae/Phaeophyceae/Rhodophyceae
4. Bryophyta: General Characters	d. Antheridium & Archegonium
5. Classes of Bryophytes	e. Liverworts & Mosses
6. Pteridophyta	f. Homospory & Heterospory
7. Gymnosperms	g. Naked seed, strobili, 3 classes
8. Angiosperms	h. Flower & fruit

Section D — True / False (Mixed Topics)

1. The Artificial System gives equal importance to vegetative and sexual characters. _____
2. Algae reproduce only sexually. _____
3. Chlorophyceae contains chlorophyll a and b. _____
4. Bryophytes need water for sexual reproduction. _____
5. Marchantia is a moss. _____
6. The sporophyte is the dominant phase in pteridophytes. _____
7. Gymnosperm seeds are enclosed within a fruit. _____
8. Angiosperm ovules are naked like gymnosperms. _____

PU-I Biology — Chapter 3: Plant Kingdom

Full Chapter Revision Worksheet

Narendra Sir — Lecturer in Biology (M.Sc Biochemistry, B.Ed, KSET Life Science) | S.R.N. Mehta PU Science College, Kalaburagi, Karnataka

Name: _____

Section: _____

Date: _____

Section E — Short Answer (Chapter-wide)

1. Why was the Artificial System of classification rejected?

2. Differentiate between isogamous and anisogamous reproduction.

3. Differentiate between the pigments of Chlorophyceae, Phaeophyceae, and Rhodophyceae.

4. Why are bryophytes called 'amphibians of the plant kingdom'?

5. Describe the two stages of the moss gametophyte.

Section F — HOTS (Chapter-wide)

1. Two plants look identical due to growing in the same shaded habitat. Explain which classification system(s) would correctly distinguish them and why.

2. Explain why algae, despite being simple thalloid organisms, are ecologically vital as primary producers.

3. Explain why red algae can survive in deeper marine water than green algae, using their pigment composition.
